Step 1: cut, wash, and iron fabric scraps into squares of various sizes

Step 2: lay down parchment paper larger than the fabric squares on to a large flat heat resistant surface

Step 3: place one pre-cut fabric square on to the parchment paper and sprinkle a very thin even coat of beeswax beads

Step 4: lay down a second large piece of parchment paper over the top of the fabric and using a warm iron carefully iron over the fabric

Step 5: once the beeswax as soaked through the fabric peel it off the parchment and allow to dry about 10 minutes

Beeswax Wrap Care: wash with cold water and soap

TIP: Start with less beeswax than you think, you can always add more to get an even coat
