DIY Hand Sanitizers

Formula

1. 2 parts isopropyl alcohol or ethanol (91-99% alcohol)
2. 1 part aloe vera gel
3. A few drops of essential oils (peppermint, lavender, eucalyptus)

Directions

1. To prep your area, wipe down counter with bleach and ensure bowls are all sterilized and clean
2. Combine 2/3 cup alcohol with 1/3 cup aloe vera gel and mix with a whisk
3. Add a few drops of essential oil of your choice and mix until blended
4. Pour mixture into a squeeze bottle and your DIY hand sanitizer will be ready to use

Coronavirus Tips

1. Hand sanitizers should NOT be used in place of hand washing - please remember to wash your hands frequently with soap
2. Always wear a face mask wherever you go, this will help slow the spread of coronavirus
